DETAILED ACTION

Election/Restrictions

1. Claims 1-6 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on February 17, 2006.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent Application Publication 2002/0005239 A1 in view of Ueyoko et al. (6,116,311).

US '239 discloses a tire similar to the claimed tire but does not disclose forming the intermediate plies as zigzag plies (see entire document: 0-35 degree range for cord angle in assembly 32 is sufficiently small that one of ordinary skill in the art would have at once envisaged the 0, 1, 2, 3, 4, and 5 degree cord angle members of the range and therefore the reference discloses them with sufficient specificity (MPEP 2131.03)), however Ueyoko et al. teach to form the intermediate belt plies in such tires as zigzag plies in order to reduce belt edge separation and thereby improve durability even when high modulus cords are used (col. 2 line 27 - col. 3 line 59); it would therefore have been obvious to one of ordinary skill in the art to form the intermediate belt plies in such tires as zigzag plies in order to reduce belt edge separation and thereby improve durability.

Allowable Subject Matter

4. Claims 7, 8, 19-21, and 25 are allowed.

Art Unit: 1733

The prior art of record fails to disclose or suggest the strips overlapped substantially throughout the shoulder portions with each shoulder portion being about 25% of the belt width of the widest belt in the claimed environment.

Response to Arguments

5. Applicant's arguments with respect to claims 22-24 have been considered but are moot in view of the new ground(s) of rejection.
